

COOWIN[®]—
DESIGNES FOR
OUTDOOR LIVING

The COOWIN WPC Product

Design meets performance

Because Looks Matter

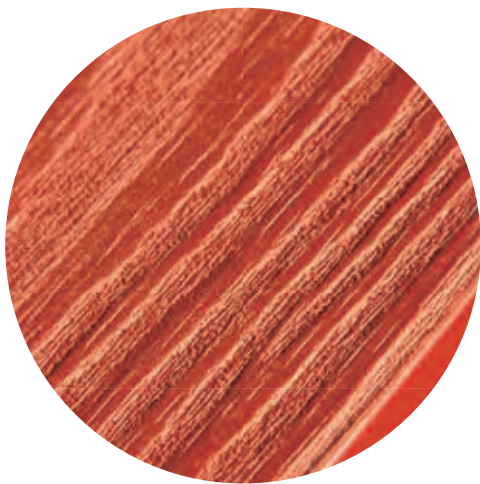

Beauty and performance lie at the heart of the COOWIN decking & Cladding family. All the products are manufactured using patented composite technology to ensure fine looks that last the tests of time.

Unique closed surface technology enables COOWIN decking & cladding to achieve superior stain resistance when compared to traditional composite or wood decks.

COOWIN WPC New Technology

— 3D Embossing

- ★ The surface is 3D embossed wood grain design.
- ★ Wood grain depth reach 1mm, don't be worry about wear and tear
- ★ The emboss will not fray to be shallow as time goes by.
- ★ Strong solid wood texture, like an carefully carved artwork.

After long-time scientific research and experiment, COOWIN has finally overcome process formula and many problems during the manufacturing, meanwhile has created wonderful production. Unique 3D embossing process, can make the surface more outstanding than before, and its relief surface can be described as artwork. By laying large tracts of land, the 3D embossing surface provides beautiful decoration, and guarantee the skid resistant function. This is the result COOWIN always trying to achieve ---- combine the Beauty and Practicality at the same time.

3D Embossing

TO FEEL PROMINENT TEXTURE

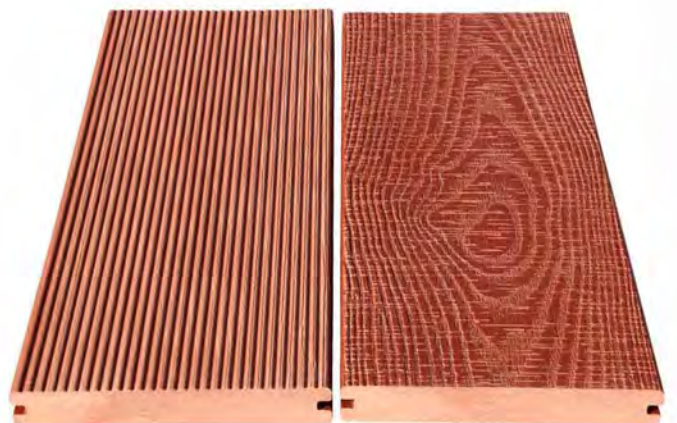

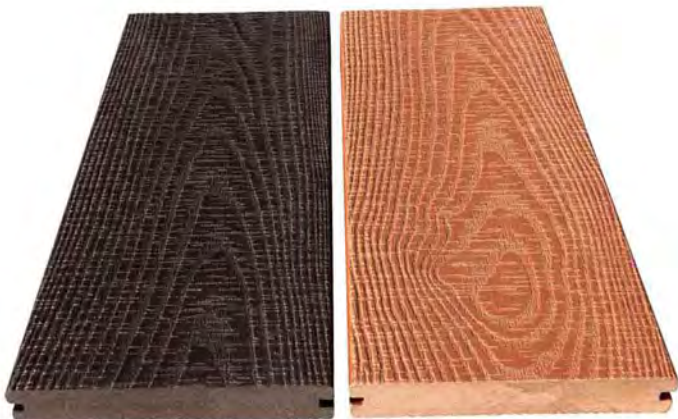

COOWIN DECK

- Fresh and modern look
- Superior stain resistance
- Better colour durability
- Better scratch resistance
- Zero degree incline possible
- High impact strength
- Good friction, wet or dry
- Recycled and recyclable
- Independent quality assurance

Explanation of Symbols

Superior stain resistance.

Better colour durability.

Zero degree incline possible.

Quick to install.

Splinter free, warm to touch.

High friction wet or dry.

High impact strength.
Better scratch resistance.

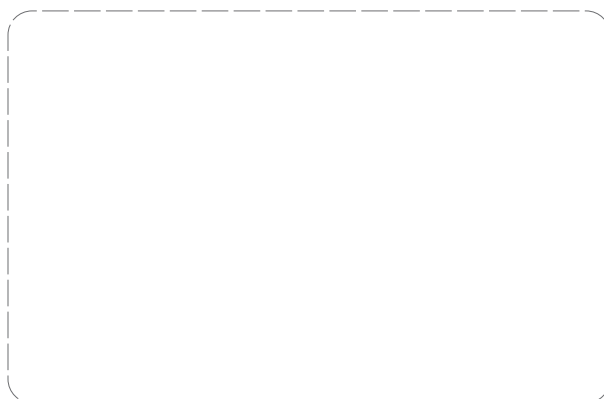

Recycled and recyclable.

Smart installation solution
